A WORLD WELL-ESTABLISHED BRAND

Founded in 1994, OPPEIN is Asia's largest cabinetry manufacturer of high quality kitchens, living, bedrooms, bathrooms, interior doors and home furnishings.

In the past 25 years, OPPEIN has established its core competencies in brand influence, mass customization and dynamic channel system. We are forging informatization as the fourth edge.

Despite its leading role in Chinese market, OPPEIN is exploring the international market mainly in the forms of project and franchise. We have business in 128 countries and regions now.

We achieve this through our unceasing striving for perfection, and the passion to satisfy individual needs of home décor.

Our vision is to make OPPEIN a modern, innovative company respected and loved by the people, held in the highest esteem in China, and emulated around the world. We deliver what we promise, and will make no compromise to offer premium products and services to our customers.

INTELLIGENT MANUFACTURING AND INFORMATIONIZATION

90% of OPPEIN's production lines are imported from Germany and Italy, which can guarantee processing preciseness and stability.

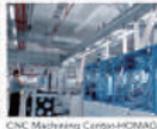

Informationization is crucial for mass-customization industries, and in order to enhance this ability, OPPEIN released its Manufacturing Whitepaper 2025 in 2017, mapping out to integrate an intelligent platform containing design, ordering, manufacturing, production control and logistics by 2025.

German & Italian Machines

90% of OPPEIN's woodworking machinery comes from Germany.

Robot Sorting DHS-HOMAG

CNC Machining Comba-HOMAG

Laser Edge Bender-HOMAG

EUROPEAN QUALITY

Striving for perfection is our philosophy.

OPPEIN has established a complete set of quality standards that align with its European counterparts, and a complex quality management system that keeps the standards on track. We oversee every process that affects quality, such as:

- Supplier selection and assessment
- Inspection of raw materials, spare parts and finished products
- Product design and development
- Shipment and installation
- Customer relations management

Every year, OPPEIN conducts more than 500 tests in its well-equipped test labs and third party testing bodies.

QUALITY DETAILS OVERVIEW

Safety, functionality and aesthetics are the three top priorities which are considered in our product design and manufacturing. The following carousel details reflects our commitment to safety. Please refer to OPPEIN Quality Guidance for more details.

ECO-FRIENDLINESS AND SUSTAINABILITY

Taking responsibility for the environment and the safety of our employees and customers has always been our core value.

All our panels comply with emission class E1, pass tests with European chamber method ENF11-1, and meet the stringent California Air Resources Board (CARB) emissions standards.

Silestone, Caesarstone and other imported quartz stone are all Greenguard certified. And DIPPEN self-manufactured quartz stone is NSF certified.

OPPEN has always been the advocate of forest protection, and FSC compliance is mandatory when choosing suppliers.

In 2011, OPPEN achieved OHSMS (Occupation Health Safety Management System).

Countertops

10000+ finished cases
3 years warranty
We are your best choice for home décor.

Hi There!

Thanking to every partner and customer and keep hope in the quality you have seen. I will keep perfect finished in 2020. Also I will keep on growing for you. I will keep doing well worldwide as the most of all. My wish and hope is being the world's #1 leader. My wish you have the best business.

I will continue to grow in 2020 and I will make more new projects and I will continue to grow with all of them.

Hi There!

I would like to share some cases for the past 20 years.

Of course there are a lot of cases, generally speaking we are following the clients' opinions considering in the first project.

All your supports & help make me greatly grateful!

I look forward to enter our new 2020 projects together.

PS: To improve the business, I have recruited them as a team.

Once again thank you.

Love You

The Partner

Product design

The glass door high cabinet makes it easier for the owner to find the item with its extending glass space-sight.

The wood grain drawer in the glass cabinet echoes the island platform.

The proportioned layout of the study enriches the sense of space.

The glass door high cabinet.

Function/ Humanization:

1. Hide the sliding door
2. Material characteristics
3. 45 degree chamfered door panel
4. Open layout design

Project in Perth

We met in the autumn fair in 2017. The client is a small builder in Perth. Before I got to know him, he had been cooperating with the cabinet factory in Shanghai. In 2018, he sent an inquiry for a project and then returned to the factory in April.

In July, I went on a business trip to Perth to take him to one retail customers' home to see the quality and installation effect of OPPEN. He felt that OPPEN was more professional, so he confirmed the order. And the order was placed in October.

India Full House Design / Kitchen

While PP Shipped is the popular choice for many people, which is sleek and eye-catching. If you are faced with the burden of ever-increasing household objects and a chronic lack of space, build a new kitchen cabinet with a useful plan.

Project in India

The client is a designer in Delhi, mainly doing hotel projects. In 2017, the designer brought his relatives here for wardrobe. After the customer paid the deposit, the local installers were immediately arranged to measure the scale. The subsequent installation was also carried out by the OPPEN installers. Because the installation effects were satisfactory, the designer later brought the hotel engineering customers to the factory.

Project in India

DEEP was an inquiry customer in early September of 2018 and we usually contacted by WeChat. He had a trading company office in Foshan Shunde Lecong, and had a certain understanding about OPPEIN before. He had a high degree of trust in big brand OPPEIN. Their main end customers were from India, the United States, the United Kingdom, Australia and the Middle East.

In the middle and late October, we were contacted and informed that he would take the terminal customers and designers to visit our factory during the second phase of the Canton Fair. Visiting the factory for three days within four days, they were satisfied with the quality and services of OPPEIN, and we communicated well through the whole process. Finally the order was successfully placed in December last year.

Open White Acrylic Kitchen Cabinet

White is always a fashionable color. The clever design makes door panels special and high-end and easy to open ensuring a clean run of units and a simple style that will always be on trend. Add a touch of glamour with a glossy finish. For the designer touch, pair with elegant appliances. A perfect base for any interior design, keep it simple or dress it up with stylish worktops and tiles to personalise your kitchen.

Project in South Africa

The customer, who had a certain understanding about OPPEIN's products and had visited the local case of OPPEIN, was introduced by the old customer in South Africa. In the Spring Trade Fair in 2018, he visited the factory and was very appreciative of the products of OPPEIN. He then also introduced his friends to OPPEIN.

Additional services for customers:

We also recommended freight forwarding for customers and handled shipping issues.

Project in New Zealand

The customer who bought the product is called Miracle, a New Zealander. A few years ago, her brother bought our products from OPPEIN and highly recognized our quality. Then he recommended his sister to come and buy. She started to have her own design. We updated the drawings and quotations according to her design plan, and then made the design adjustment.

The customer in boldy chose the panel, finding the total price down beyond the budget, so she wanted to choose the replacement materials. We recommended the double decorative sides wood grain PWWWG2. According to her needs, we also recommended her a new process technology material, Methacrylate Layer PWB0030, except Fireproof materials.

Project in Columbia

The customers from American Columbia are brought by the trading company. They visited the exhibition hall in May 2018. When they came in, the customer and his wife liked our design very much and chose our new model according to the apartment type - the modern era. After confirming the favorite style, the customers looked over our accessory design and also informed the favorite style, so that we can make a quotation and preliminary design.

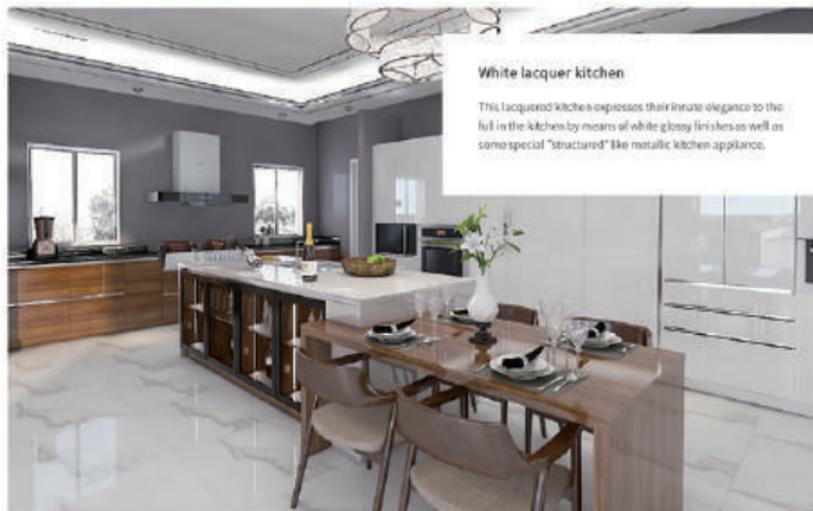

After the quotation, the customers asked the engineer to make preliminary drawings with us and visited the factory again in July. After the customer visited the factory again, they still did not change the style of the modern era. Therefore, we discussed the details of the drawings and confirmed the order after the customer visited China one week later.

The order was placed in August after all details were confirmed. Trading companies agreed with our products and services, and felt that our designs are very high-end. The customers' cabinets were shipped in October and installed in February. We provided the installation service to the customers, and they were satisfied with the effect. At the same time, they said that they will recommend friends to buy in the future.

Products:

kitchen cabinet

White lacquer kitchen

This lacquered kitchen expresses their innate elegance to the full in the kitchen by means of white glossy finishes as well as some special "structured" like metallic kitchen appliance.

Project in USA

Mr. Wang is an admirable American customer, who takes 30 years from scratch to become a billionaire. In 2015, he chose to immigrate to Boston as an investor. This large villa with an area of 3,000 square meters is the best destination for his wife and three lovely daughters. Mr. Wang likes New England style, a typical local style. From the online inquiry, to come to the factory to visit the exhibition hall, to select samples, and to design the plan, we communicated with each other smoothly. Our OPPEN team also went to Boston in person for measuring service, and finally we placed the order for production successfully. We hope that OPPEN can bring Wang a happier life.

Project in Perth

The builder in Perth, Australia, has already had a certain understanding of OPPEIN in the early stage so he sent out the drawings of five apartments. Because the elevations provided by the customers in the previous period had been very detailed, and the customers were also very professional in design and structure. Only a few modifications to the drawings were needed, and it took relatively short time and less effort in the second phase. We estimated that it took only over two months from receiving the customer's drawings to placing the order.

After the installation, they were satisfied with the effect. After some leftover orders appeared, we responded quickly and gave customers feedback and solutions. Finally, they were also very satisfied with our after-sales service.

Project in Canada

Miss Zhang from Canada is a customer introduced in China. At first, we offered a quotation, but we spent a lot of time in making the plan. In order to speed up the transaction and determine the plan as soon as possible, we asked the design supervisor to provide the most professional design suggestions to the customer directly, which directly enhanced the customer's trust in OPPEIN.

Due to the customer's lack of import experience, we recommended the freight forwarder to the customer and provided door-to-door service, so that the customer would be very worry-free in the later stage and the installation could be started after the goods were delivered to the door of the house.

Kitchen cabinet

Project in Perth

The client in Perth, Australia, is a non-native Australian but of Indian descent. The cabinets he purchased this time are mainly used in his two houses in Perth and Africa. We received the enquiry at the end of June of 2018. After two weeks, the customer visited our factory and we made a preliminary evaluation and design plan to him directly. Then we received a 10% deposit from the customer on the spot, and he returned to the country quickly to make a detailed plan to us. We followed up the customer instantly and then he confirmed the plan promptly. Then we made a rendering according to his requirements. The customer was very satisfied and placed the order after giving the remaining 20% deposit in August.

Kitchen cabinet and wardrobe

Project in Sydney

The client is a small builder in Sydney, the inquiry client who has two houses. We received the client's drawings in July 2017 and he placed the order in November. The communication process of this program is mainly about the special requirements for the design of the wardrobe door handle. Later, we found the outsourcing to provide the satisfying plan to the customer and also recommended the freight forwarders. The customer was very satisfied with our prices, product qualities and after-sales services, and said that we are very professional and that the rest of the projects must come to us to continue. At present, the client is communicating with us about his other three houses, and he will send the drawings after finalizing the design scheme.

Flat Pack

Place honeycomb paper at the bottom.

Put the panel in the middle.

Pack the panels in turn, and separate with EPE foam.

Fill the void with honeycomb paper.

Place the honeycomb paper on the top.

Cut the cartons into suitable sizes.

Flat Pack

Cover honeycomb paper cartons on slides.

Tightly wrap the carton with tape, place on the packing strap evenly.

Label the carton with shipping mark.

Tighten the cabinet with belts.

Palletizing Process

STEP 1

Place the pallet on the flat floor.

STEP 2

Stack pre-assembled units orderly from one side to another side. Packed units must NOT exceed pallet boundary.

STEP 3

In order to keep the stacks stable, make sure the stack height is less than 2350mm (including the pallet height).

STEP 4

Cover the 4 side edges with cardboard edge strips, then fix it with tape.

STEP 5

Tightly wrap all units with stretch film.

STEP 6

Cover the top edges with cardboard edge strips, then fix it with tape.

Palletizing Process

STEP 7

Tighten the palletized units with plastic belts. 4 belts in horizontal direction and 2 belts in vertical direction.

STEP 8

Label the pallet with shipping mark. The shipping mark can be specified.

Pre-assembled Pack

Wrap each cabinet completely with EPE foam, no exposures.

Fix EPE foam with blue tapes.

Fix edge strips with all edges.

Tightly wrap the cabinet wholly with stretch film.

Label the cabinet with shipping mark.
